

Department of Animal, Dairy and Veterinary Sciences

Summer Undergraduate Research Internship

Are you interested in research and/or want to learn more about scientific research in animal agriculture and biomedicine? If so, you may be interested in participating in the ADVS Summer Undergraduate Research Internship Program. In this program, you will work under the guidance of a faculty member in the ADVS Department and his/her graduate students and other laboratory personnel. Areas of study include:

- Animal Health and Disease
- Animal Models for Biomedical Research
- Animal Molecular Genetics
- Animal Nutrition and Growth Biology
- Biotechnology, Epigenetics and Stem Cells
- Reproduction and Development
- Toxicology
- Virology and Antiviral Research

Eligibility:

- Two positions will be available for students currently enrolled in the ADVS Department with a minimum GPA of 3.3 (must be a continuing student in the fall).
- Two positions will be available for students across USU or at other universities (minimum GPA of 3.3).

Benefits:

- \$4,000 stipend (i.e., salary) for the summer.
- Valuable experience in a world-class university research environment.
- Hands-on laboratory and/or animal research experience.

For application instructions and a list of participating faculty, please contact Cara Allen in the ADVS Office at 435-797-2162 or cara.allen@usu.edu. Applications are due Friday, March 8, 2019 at 5:00 pm. Selection of interns will be made by March 22, 2019.
