This is a graded discussion: 5 points possible

due Sep 13, 2019 at 5pm

Week 3 Discussion

224 / 224

There are two feral groups of animals that often fall under public scrutiny and controversy: [feral cat colonies](#) and [free-roaming horses](#). For both groups of animals:

1. describe what they are
2. describe one positive effect of keeping each group of animals around
3. contrast one negative effect that these animals might have on the environment/community
4. Should we keep these animals around (support their populations)?

To get full credit for the discussion you need to post your primary response by Wednesday at midnight, and then reply to at least one peer by the Friday 5 pm deadline.

1. [Ecological Effects of Free-Roaming Horses in North American Rangelands.pdf](#)
2. [The impact of free-ranging domestic cats on wildlife of the United States.pdf](#)
